Shaniaya Griffin, MLS

Statement

The sacrosanct mission and vision of Nourish the Future to combat food insecurity in a sustainable manner aligns directly with my core values regarding diet, environmental conscientiousness and individual agency. I shall utilize my extensive knowledge of programming languages and business intelligence tools to contribute comprehensively to the organization. Given my educational accomplishments and professional work experience, I will execute assignments in lockstep with colleagues for community members in need. My personal conviction to optimal food selection and consumption coincides with heightening awareness of improving nutrition. I anticipate focusing these perspectives onto a seamless integration of data into nuanced visualizations. Whilst my current objectives appear nebulous, there is immutable certainty in my commitment to Nourish the Future in the coming months. I am dedicated to inciting positive change for our community to achieve our mission set forth in a continuously integrated and developed manner.
